

System Design Crash Course: Quick Revision Before Interviews

Rahul Rajat Singh

Section 1: How to Use This Course

System Design Crash Course: Quick Revision Before Interviews

Rahul Rajat Singh

What This Course Is (And Is NOT)

- Interview revision, not fundamentals
- One concept per lecture
- Short, focused explanations
- Frameworks over memorization
- Built for interview recall

How to Use This Course 24 Hours Before an Interview

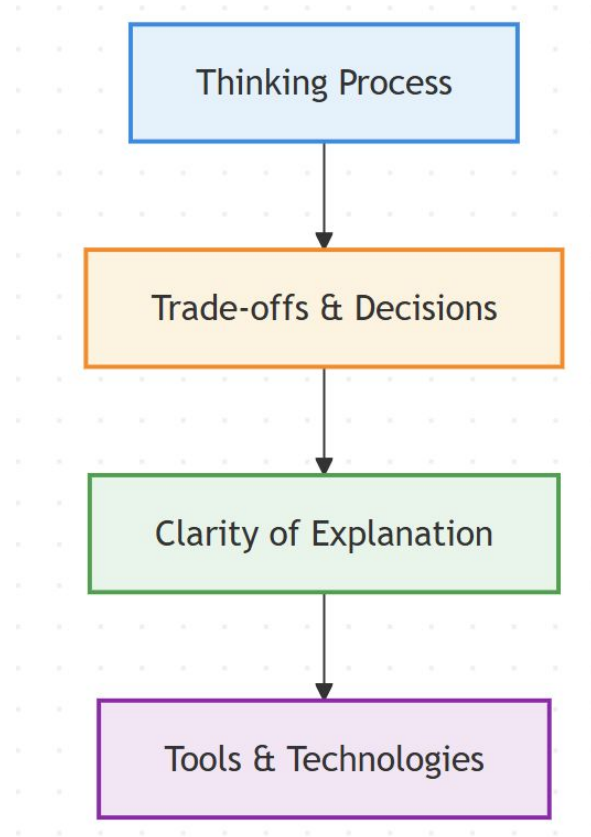

- Start with mindset sections
- Prioritize weak areas first
- Skip already-strong topics
- Think, don't binge-watch
- Focus on structure, not depth

How to Use This Course 1 Hour Before an Interview

- Skim, don't deep dive
- Recall, not new learning
- Review frameworks only
- Speak answers out loud
- Stay calm and structured

How Interviewers Evaluate System Design

- Thinking process matters most
- Trade-offs over perfection
- Clear communication is critical
- Tools are secondary
- No single “right” answer

The System Design Mental Model

- Clarify requirements first
- Draft simple high-level design
- Identify bottlenecks early
- Discuss trade-offs clearly
- Repeat loop as needed
